## Barrier Equipment

### BARRIER POSTS (Retractable Belt)

#### Barrier Posts & Retractable Belts.

CED's elegant mirror finished stainless steel barrier posts with their integral retractable belts, are specially designed to help form waiting lines, direct the flow of crowds, control access and enhance safety. These robust, independent and flexible barrier solutions clearly identify waiting areas and can be inter-connected in four different directions, via the four way s/steel rope hook receiver on the post top.

**Eye Catching Features.** The solid, weighted, stable post base is hidden under a mirror finish outer cover. The base features an integral rubber gasket which prevents floor damage. The posts are linked together with retractable 50mm wide barrier belts, to cordon off the desired space. You can choose between classic red or black belts. Each tape is 2M long and features lockable connection clips that slot onto the adjoining post, for a simple post connection. Just turn the top of the connection clip to lock it to the four way connection point on the post top.

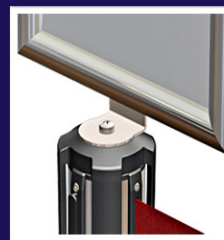

**Barrier Post & A4 Sign Holder.** The simple push fit cap locates the sign holder on the barrier post. The post can then be used as a barrier and also a communication point for your customers! The A4 size, chrome finished sign holder is waterproof and portrait orientation. The visible printable area is 208 mm (w) x 295 mm (h)

**Barrier Post & Electronic Sanitiser Dispenser (Alcohol Gel).** The same simple push fit cap locates the hands free sanitiser dispenser on the barrier post. The 600ml dispenser delivers approx. 500 doses and uses 4 x AA batteries (not supplied). An optional **electrical plug** – Lead Length (2 M) is available (Code ESPDP)

**Health & Safety.** Barrier posts provide an ideal solution for risk assessments, undertaken by businesses in compliance with the FDA June 2020 UK Government Guidance 'Keeping workers and customers safe during COVID-19 in restaurants, pubs, bars and takeaway services'.

**Electronic Sanitiser:** Push Fit Connection On Post Top.

**A4 Sign Holder:** Push-Fit Connection On Post Top.
