

Ventilation / Display Performance Considerations

- 1) Area in which display is to be sited must have a minimum room volume no less than 132 cu m.
- 2) Install over a sealed floor or ventilated floor void.
- 3) Do not site the display within 2m of ceiling mounted air conditioning grilles.
- 4) Do not site the display beneath a high level of direct sunlight.
- 5) Display will operate in a 24 hour environment.
- 6) Access to maintain condensing unit should be made via removable fascia panels or doors to customer and operator side of counter.

A PLENUM OR 4 SIDED TUNNEL MUST BE FITTED BETWEEN THE REAR FACE OF THE CUSTOMER SIDE FASCIA PANEL AND THE FRONT FACE OF THE COMPRESSOR CRADLE, AROUND THE AIR INTAKE CUT-OUT, TO STOP THE RE-CIRCULATION OF HOT AIR FROM THE COMPRESSOR.
