Barrier Equipment

GUIDE POSTS & ROPES/ HOOKS.

Guide Posts & Ropes/ Hooks.

CED's elegant mirror finished stainless steel guide posts and braided guide ropes are specially designed to help form waiting lines, direct the flow of crowds, control access and enhance safety. These robust, independent and flexible barrier solutions clearly identify waiting areas and can be inter-connected in four different directions, via the four way s/steel rope hook receiver on the post top.

Eye Catching Features. The solid, weighted, stable post base is hidden under a mirror finish outer cover. The base features an integral rubber gasket which prevents floor damage. The posts are linked together with hanging barrier ropes to cordon off the desired space. You can choose between classic red or black Ø 28mm braided guide ropes. Each rope is 1.5M long and features chrome circular clips at each end, for simple post connection.

GUIDE POST & A4 SIGN HOLDER

1 no. HGPSH Post,
1 no. HGRR Rope
Shown.

Guide Post & A4 Sign Holder. The mirror finished post top features a steel plated rope hook receiver, held in place by a threaded dome cap. Simply unscrew and then re-fit the cap to add the sign holder mounting bracket. The post can then be used as a barrier and also a communication point for your customers!

The A4 size, chrome finished sign holder is waterproof and portrait orientation. The visible printable area is 208 mm (w) x 295 mm (h).

GUIDE POST & ELECTRONIC DISPENSER

Guide Post & Electronic Dispenser.

Easy To Use. By placing your hands underneath the electronic dispenser, the infra red detection cell discharges a measured dose of sanitising gel. The dispenser is simple to refill too. The guide post features a large dispensing capacity of approx. 500 doses. The slotted window in the electronic dispenser provides easy monitoring of gel level. You can easily install or relocate the guide post and electronic dispenser in many

locations as there is no electrical connection.

The dispenser uses (4 x) AA batteries – not included. There is also an option for a UK plug with 2m electrical lead (Option Code ESPDP).
