Replacement Parts

Hot Cupboard

Model DL12HC DL15HC DL18HC

Health and Safety

It is essential that your Hot Cupboard has been provided with an electrical supply by a qualified electrician. Before commencing any maintenance operation, the Hot Cupboard must be isolated from the mains supply, either by removing the supply plug from its socket, or switching off at the local isolator.

NB: Switching off using the power switch on the control panel does not fully isolate the unit.

Parts replacement must only be undertaken by a competent installer.
