

New

Tournus Equipement is developing its TS 2000N wash basin range with several new features.

ONE-PIECE WASH BASIN

Comes in 2 versions :

WITH ELECTRONIC CONTROL

Infra red detection cell.
Robust and reliable French-made tap.

KNEE-OPERATED

Push button positioned on front panel.

INSET BIN

This recess allows straightforward installation of the wash basin, regardless of the room taken up by the water inlet and evacuation pipes.

EASIER INSTALLATION

Thanks to the fixing strip at the rear of the splash back. Fitters simply fit the wash basin on the strip previously fixed to the wall with 3 screws. The tap can be assembled either before or after the bowl is installed.

TS 2000N with electronic control :	Ref.	Overall dim. l x W x h (mm)
